Trading Coaching Academy — Design Team

and students to access their batch's lectures, quizzes, assignments, and live classes — all in a secure, controlled environment.

Core Philosophy

- Admin-controlled enrollment — no self-serve payment or public course access.
- Batch-restricted content — students see only their assigned batch.
- YouTube Unlisted for video hosting — hidden URLs, embedded player.
- Auto-attendance based on lecture watch percentage ("e80% = Present).
- Strong security: single device login, screenshot protection, root detection.

Target Platform

Android only (Flutter). Admin panel: Flutter Web. Backend: Firebase (Firestore, Auth, FCM, Analytics, Crashlytics).

Three User Roles

Role	Key Permissions	Cannot
Admin	Full control: students, faculty, batches, courses, quizzes, assignments, certificates, announcements, push notifications	—
Faculty	Upload lectures/notes, create assignments/quizzes, schedule live sessions, view student progress & attendance	Manage students/faculty, assign batches, issue certificates
Student	Watch lectures, join live classes, download notes, submit assignments, attempt quizzes, view attendance, receive notifications, download certificates	Admin or faculty functions

Registration & Access Flow

1. Student self-registers (Name, Mobile, Email, DOB, Gender, Address, Parent info)
2. Account created !' Status: "Pending Batch Assignment"
3. Admin reviews and assigns student to a Batch (e.g., Advanced Trading Batch A)
4. Course access unlocked automatically — student can now view all batch content

Course Structure

Each batch contains a course with the following structure:
Course !' Lectures (YouTube Unlisted embedded) + Notes (PDF/PPT/DOCX) + Assignments (upload submission) + Quizzes (MCQ, timed, auto-evaluated)

Color Palette

Token	Hex	Usage
Background	#F8F AFC	App background, page fill
Card	#FFFFFF	Card surfaces, bottom nav
Navy	#0F172A	Header backgrounds, dark sections
Primary Blue	#2563EB	CTAs, active state, "You" highlight
Emerald	#10B981	Success, attendance present, positive change
Amber	#F59E0B	Warnings, streak, gold rank, live badge
Red / Danger	#EF4444	Errors, live class badge, negative rank change
Purple	#8B5CF6	Quizzes, secondary accents
Muted	#94A3B8	Inactive nav, placeholder text
Border	#E2E8F0	Card borders, dividers

Typography & Layout

Font: Poppins (Google Font)
Frame size: 390 × 844 px (standard mobile — mirrors iPhone 14 / mid-range Android)
Every student screen includes: status bar !' navy header !' scrollable content area !' bottom navigation bar (5 tabs: Home, Courses, Schedule, Progress, Profile)
Every admin screen includes: sidebar navigation + top bar + content area with data tables/charts.

Demo Data Conventions

Logged-in student: Rahul Sharma (RS) — Batch: Advanced Trading Batch A — Quiz avg: 88% — Attendance: 91% — Rank: #4
Faculty name: Dr. Anand Kumar
All quiz topics and lecture titles are realistic trading/stock market content (Options Chain, Support & Resistance, Volume Profile, Derivatives, etc.)
Indian names used throughout for realism.

All 27 student-facing screens have been designed and are live on the canvas mockup board.

#	Screen Name	File	Description
1	Onboarding / Splash	Onboarding.tsx	App intro with 3 animated slides covering key features (Batch Learning, Live Classes, Track Progress). "Get Started" CTA
2	Login / Welcome	LoginScreen.tsx	Email + password login. Google Login button. Links to Register and Forgot Password. Navv header with ann
3	OTP Verification	OTPVerification.tsx	6-digit OTP entry after registration or Google login. Resend timer. Verifies email ownership before account activation
4	Student Registration	RegistrationScreen.tsx	Full multi-field form: Full Name, Mobile, Email, DOB, Gender, Address, Parent Name, Parent Mobile. Validation on each
5	Forgot Password	ForgotPassword.tsx	Email input to trigger password reset link. Confirmation message shown after submission
6	Reset Password	ResetPassword.tsx	New password + confirm password fields with strength indicator. Triggered via email link
7	Student Home	StudentHome.tsx	Main dashboard. Shows: greeting + avatar, Live Class banner (red), 3 quick stats (Attendance, Quiz Avg, Rank). Continue
8	Pending Batch Assignment	PendingAssignment.tsx	Shown after registration when admin has not yet assigned a batch. Friendly waiting state with illustration and estimated
9	Course Detail & Enroll	CourseDetail.tsx	Course overview: title, faculty, duration, module list with lecture count. Enroll CTA. Pre-enrollment state with locked
10	Course Player	CoursePlayer.tsx	YouTube Unlisted embedded player (hidden URL). Lecture title, faculty, module context. Auto-attendance trigger
11	Assignment Submission	AssignmentSubmission.tsx	Shows assignment brief (downloadable). Upload area for PDF/image submission. Submission status (Pending / Submitted /
12	Quiz Flow	QuizFlow.tsx	MCQ quiz screen: question counter, countdown timer, 4 answer options. Progress bar. Auto-evaluation on completion
13	Attendance View	AttendanceView.tsx	Monthly calendar with Present (green) / Absent (red) / Partial (amber) color coding. Below: per-lecture attendance log with
14	Live Class	LiveClass.tsx	YouTube Live embedded inside app. Class title, faculty, batch. LIVE badge with pulse animation. Chat panel. "Raise Hand"
15	Live Class Waiting Room	WaitingRoom.tsx	Pre-class screen: class details, faculty name, scheduled time, countdown timer. "Class will begin shortly" state. Notify me
16	Schedule / Timetable	Schedule.tsx	Weekly calendar view. Lecture, quiz, assignment, and live class events color-coded. Day selector. Incoming events list
17	Notifications	Notifications.tsx	Push notification inbox. Categories: All, Lectures, Assignments, Quizzes, Live, Certificates. Unread count
18	Student Profile	StudentProfile.tsx	Personal info section (name, email, mobile, DOB, batch). Edit profile option. Parent info. Account stats (login date, streak)
19	Progress & Analytics	ProgressAnalytics.tsx	Overall completion ring (68%). Progress bars for Course Progress, Attendance, Quiz Average. Stats grid: Lectures
20	Doubt & Q&A	DoubtQA.tsx	Ask a question (text + optional image/attachment). Browse answered questions from faculty. Filter by module. Upvote
21	App Settings	AppSettings.tsx	Account section (change password, email prefs). Notifications toggle by type. Security (connected devices, active sessions)
22	Certificate	Certificate.tsx	Earned certificate display. Certificate image/preview. Course name, completion date, admin signature. Download as PDF
23	Payment & Checkout	Payment.tsx	& p NOTE: Original spec says no payment gateway. This screen was designed as an enhancement. Shows fee summary
24	Payment Success	PaymentSuccess.tsx	Success state after payment. Order summary, receipt download. Auto-redirect to Home after 5 seconds. & b. Same
25	Mock Trading / Paper Trade	MockTrading.tsx	'(Enhancement beyond original spec. Virtual trading simulator: select stock, set buy/sell quantity, paper trade with live mock
26	Student Wallet	StudentWallet.tsx	'(Enhancement beyond original spec. Wallet balance, transaction history, add funds CTA. Linked to Payment flow
27	Leaderboard	Leaderboard.tsx	Weekly/Monthly/All-Time tabs. Podium with gold/silver/bronze top 3. Full rank list: quiz %, attendance %, task completion, streak days, rank change (% ²⁰ % ¹ / ₄). "You" card always pinned with blue border. Badges section (earned vs locked). "How to Climb Faster" tip panel with personalised actionable advice.

12 admin web panel screens have been designed. These are desktop/tablet-optimized views for the academy admin.

#	Screen Name	File	Description
1	Admin Dashboard	AdminDashboard.tsx	KPI cards: Total Students, Faculty, Active Batches, Attendance rate, Recent activity feed, Batch-wise
2	Student Management	StudentManagement.tsx	Paginated student list with search and filter. Columns: Name, Email, Batch, Join Date, Status, Actions: View
3	Batch & Course Management	BatchCourseManagement.tsx	List of all batches with student count, course assigned, status. Create new batch CTA. Per-batch: edit, view
4	Admin Reports & Analytics	AdminReports.tsx	Attendance reports by batch/date range. Quiz performance charts. Student activity heatmap. Export to CSV option
5	Admin Announcements	AdminAnnouncements.tsx	Compose announcement with title + body. Target: All Batches or specific batch. Schedule vs send now. History
6	Admin Faculty Management	AdminFaculty.tsx	Faculty list: name, email, assigned batches, status. Add new faculty form. Permissions toggle per faculty. Remove/
7	Admin Course Builder	AdminCourseBuilder.tsx	Module-based course builder. Add lecture (YouTube URL + title + duration), add notes (file upload), create quiz, create
8	Admin Student Detail	AdminStudentDetail.tsx	Full profile of individual student: personal info, batch, attendance chart, quiz history, assignment status, device/
9	Admin Batch Creation	AdminBatchCreate.tsx	Create batch wizard: batch name, description, assign faculty, add students (search + multi-select). Set start date
10	Admin Live Class Mgmt	AdminLiveClass.tsx	Schedule live class: date/time, title, faculty, target batch. Paste YouTube live link. Notify batch toggle. History of
11	Admin Assignment Review	AdminAssignmentReview.tsx	List of submissions per assignment. Student name, submission time, file preview. Marks input + feedback text
12	Admin Quiz Results	AdminQuizResults.tsx	Per-quiz analytics: score distribution, average, top/bottom scorers. Per-student result table. Question-by-question breakdown of common mistakes.

The following screens are required per the original spec or standard app conventions and have not yet been designed. Priority: HIGH must be done before any development handoff.

5A. Student App — Pending (6 screens)

ID	Screen	Priority	Notes
P1	Notes / Downloads	HIGH	In-app PDF/PPT/DOCX viewer + download list. Students access batch notes. In-app viewing vs download-only needs clarification from client
P2	Quiz Results Detail	HIGH	Post-quiz result screen: final score, correct vs wrong answers with explanations, time taken, comparison to batch average. Can retry or exit
P3	Google Sign-In Flow	MEDIUM	OAuth redirect/callback screen. Shown briefly during Google login. May just be a loading state if handled natively by Firebase
P4	Account Deletion	MEDIUM	Required for Google Play Store compliance. Multi-step confirmation. Data deletion request form. 30-day cooling period notice
P5	Privacy Policy / T&C	MEDIUM	In-app webview or static screen showing Privacy Policy and Terms & Conditions. Required for Play Store submission
P6	Notes PDF Viewer	MEDIUM	In-app PDF render (flutter_pdfview or similar). Zoom, scroll. No screenshot (FLAG_SECURE). Download to device option.

5B. Admin Panel — Pending (6 screens)

ID	Screen	Priority	Notes
A1	Admin Login	HIGH	Separate login screen for admin. Email + password only (no Google). 2FA option. Different from student login URI
A2	Admin Notification Center	HIGH	Compose + send push notifications via FCM. Target: individual student, batch, or all. Schedule delivery. View delivery state
A3	Admin Certificate Mgmt	HIGH	Upload signed certificate PDF. Assign to specific student. Generate from template option. View all issued certificates
A4	Admin Quiz Builder	HIGH	Create MCQ quiz: add questions, 4 options, correct answer, marks per question. Set timer. Preview before publishing. Assign to batch
A5	Admin Assignment Creator	MEDIUM	Upload assignment PDF brief. Set deadline. Set total marks. Assign to batch. View submission status dashboard
A6	Admin Attendance Detail	MEDIUM	Per-student attendance drill-down. Lecture-by-lecture watch log. Override attendance manually. Bulk export per batch.

5C. Faculty Portal — Entirely Pending (8 screens)

The Faculty portal has NOT been started. All 8 screens are pending.

ID	Screen	Priority	Notes
F1	Faculty Login	HIGH	Email + password login for faculty. Separate from student app (web portal).
F2	Faculty Dashboard	HIGH	Overview of assigned batches, pending tasks (submissions to review, upcoming live sessions), student activity summary
F3	Faculty Upload Lecture	HIGH	Form: lecture title, YouTube Unlisted URL, duration, module, batch. Preview before publish
F4	Faculty Create Quiz	HIGH	MCQ builder: question text, 4 options, correct answer, marks, time limit. Batch assignment. Publish or save draft
F5	Faculty Create Assignment	HIGH	Upload assignment PDF, set deadline, set marks, assign to batch. Track submission count
F6	Faculty Schedule Live	HIGH	Form: class title, date/time, YouTube Live link (paste after stream created), target batch. Student notification toggle
F7	Faculty View Attendance	MEDIUM	Per-lecture attendance breakdown. See which students watched how much. Export to CSV
F8	Faculty Student Progress	MEDIUM	Per-student or batch-level view: quiz scores, assignment marks, attendance %, course completion. Read-only.

6A. Items in Spec — Fully Covered *

- * Student Registration (all required fields: Name, Mobile, Email, DOB, Gender, Address, Parent info)
- * Login: Email + Password + Google Login + OTP Verification
- * Pending Batch Assignment state (student sees waiting screen after registration)
- * Admin assigns student to batch ! Course access unlocked flow
- * Lecture viewing with embedded YouTube player
- * Attendance: auto "80% watch = Present logic shown in design
- * Quiz: MCQ, timer, auto-evaluation, instant result, score tracking
- * Assignment: download brief + upload submission + faculty review + marks
- * Live Class: YouTube Live embedded inside app
- * Notifications: inbox with all notification types (lecture, assignment, quiz, attendance, live, certificate)
- * Certificate: view + download
- * Student Profile + Progress & Analytics
- * Schedule / Timetable (calendar view)
- * Admin Dashboard, Student Mgmt, Faculty Mgmt, Batch Mgmt, Course Builder
- * Admin: Batch Creation, Live Class Mgmt, Assignment Review, Quiz Results
- * Admin Reports & Analytics
- * Leaderboard (gamification — enhances student motivation)

6B. Items in Spec — Partially Covered Ø=Ý6

Ø=Ý6 Notes / Downloads: Listed in spec but no dedicated Notes screen designed yet (P1, P6 pending).

Ø=Ý6 Quiz Results Detail: Quiz flow designed but post-quiz detailed result screen not yet done (P2 pending).

Ø=Ý6 Admin Notification Center: Announcements screen exists but dedicated push notification composer not done (A2 pending).

Ø=Ý6 Admin Certificate Management: Certificate view on student side done, admin upload/generate screen not done (A3 pending).

Ø=Ý6 Faculty Portal: Zero screens done — all 8 faculty screens pending.

6C. Items Designed — NOT in Original Spec & p

These screens were added as enhancements. Client confirmation needed:

& p Payment & Checkout (Payment.tsx) — Spec says "No payment gateway." Needs client decision.

& p Payment Success (PaymentSuccess.tsx) — Same caveat.

& p Student Wallet & Transactions (StudentWallet.tsx) — Not in spec.

& p Mock Trading / Paper Trade (MockTrading.tsx) — Not in spec. Good engagement feature but needs sign-off.

& p Doubt & Q&A (DoubtQA.tsx) — Not in spec, but aligns well with coaching use case. Recommend keeping.

& p Forgot / Reset Password screens — Not explicitly in spec but required for any app. Safe to keep.

& p Live Class Waiting Room (WaitingRoom.tsx) — Enhancement. Safe to keep.

6D. Items in Spec — NOT Yet Designed Ø=Ý4

Ø=Ý4 Faculty Portal (all 8 screens) — Highest gap area.

Ø=Ý4 Admin Login screen.

Ø=Ý4 Admin Quiz Builder (admin creates quiz — only results view done).

Ø=Ý4 Admin Assignment Creator (admin/faculty creates assignment — only review done).

Ø=Ý4 Notes viewer / PDF viewer screen.

Ø=Ý4 Account Deletion screen (Play Store requirement).

Ø=Ý4 Privacy Policy / T&C in-app screen (Play Store requirement).

Account Security

- Single Device Login — new login forces logout on previous device
- Firebase Authentication with Email Verification
- Session Control + Force Logout capability from admin
- Email OTP verification on registration

App Security (Android)

- FLAG_SECURE — prevents screenshots and screen recording
- Root Detection
- Emulator Detection
- Developer Options Detection
- USB Debugging Detection
- SSL Pinning
- Tamper Detection
- R8 Code Obfuscation

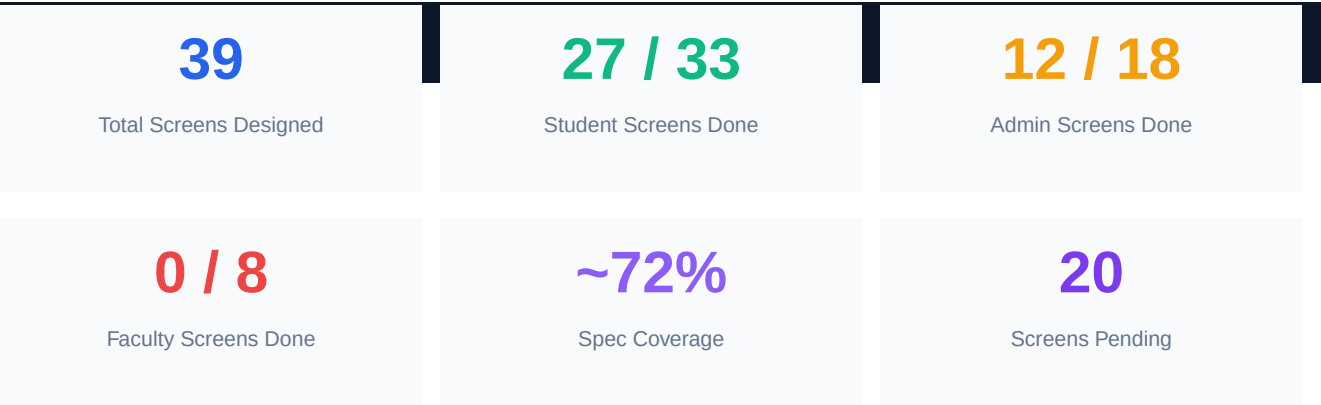

Content Security

- YouTube URLs hidden — never exposed to student (embedded only)
- Batch Access Validation — Firestore rules ensure students see only their batch
- Role-Based Authorization on all API calls
- Firebase Security Rules enforced server-side
- Token Validation on every request

Admin Monitoring

Admin can monitor: Login history, Device history, Active sessions, Suspicious login attempts.

Timeline	Task	Priority	Notes
Week 1	Design Faculty Portal (F1–F8)	HIGH	8 screens — zero done, critical for dev handoff
Week 1	Notes / PDF Viewer (P1, P6)	HIGH	Core learning feature missing from student side
Week 1	Quiz Results Detail (P2)	HIGH	Completing the quiz flow end-to-end
Week 1	Admin Login (A1)	HIGH	Required before admin panel dev starts
Week 2	Admin Notification Center (A2)	HIGH	FCM push from admin — key feature
Week 2	Admin Certificate Mgmt (A3)	HIGH	Certificate lifecycle needs admin side
Week 2	Admin Quiz Builder (A4)	HIGH	Faculty/admin creates quizzes
Week 2	Admin Assignment Creator (A5)	MEDIUM	Completes assignment lifecycle
Week 3	Account Deletion (P4)	MEDIUM	Play Store mandatory
Week 3	Privacy Policy screen (P5)	MEDIUM	Play Store mandatory
Week 3	Client Decision on Payment/Wallet/Mock Trading	& p	Keep or remove based on spec alignment

Quick Reference — All Designed Screens

Student App (27): Onboarding, Login, OTP, Registration, Forgot Password, Reset Password, Home, Pending Batch, Course Detail, Course Player, Assignment Submission, Quiz Flow, Attendance, Live Class, Waiting Room, Schedule, Notifications, Profile, Progress & Analytics, Doubt & Q&A, Settings, Certificate, Payment, Payment Success, Mock Trading, Wallet, Leaderboard

Admin Panel (12): Dashboard, Student Management, Batch & Course Mgmt, Reports & Analytics, Announcements, Faculty Management, Course Builder, Student Detail, Batch Creation, Live Class Mgmt, Assignment Review, Quiz Results

Immediate Action Items

- 1. Ø=Ý4 Start Faculty Portal design (F1–F8) — biggest gap
- 2. Ø=Ý4 Design Notes/PDF Viewer screen for students (P1, P6)
- 3. Ø=Ý4 Design Quiz Results Detail screen (P2)
- 4. Ø=Ý4 Design Admin Login screen (A1)
- 5. & p Get client decision on Payment, Wallet, Mock Trading screens (not in spec)
- 6. Ø=Ý6 Design Admin Notification Center (A2) and Certificate Mgmt (A3)
- 7. Ø=ÜË Design Account Deletion + Privacy Policy screens (Play Store compliance)

This report was auto-generated on June 24, 2026. App Context has been saved to agent memory (agents/memory/app-context.md) so the AI assistant will always remember the full product context without you needing to re-explain it each session.
